

- Age **If this is posed as a question; I find it too irrelevant, as I don't evaluate people based on their age, more so on their revealed thoughts and actions. I think a person about to vote for someone to represent their interests also will not vote for someone based on their age.**

- Number of years living in PoCo **42**

- Occupation **Entrepreneur**

- What civic committees and community volunteer work have you done?

I have done and continue doing volunteer activities in the community; as example, providing transportation for children's groups, being involved with youth and adult sports groups, mentoring youth to guide their principles, volunteering of services to local churches.

- Who is funding your campaign? **My campaign is self-funded and from volunteer of services.**

- What makes you stand out from other candidates?

A non-egotistical approach to ensure council is a resident taxpayer representation and all activities at city hall are according to the BC Community Charter! I represent municipal spending thrift and finding new sources of revenue that are not the resident taxpayer, to keep taxes lower!

- Do you believe that Port Coquitlam residents are getting good value for their tax dollars? Explain.

Port Coquitlam residents can get good value for tax dollars by keeping costs of operations at city hall to a minimum and not at a cost of loss of services to the residents of the community. A cutting of services is not good value for the tax paid, also, taxpayer funds used to transport goods to a private corporation is wasteful and terrible value for tax dollars!

- When it comes to budgeting, are you more likely to support cutting services and staff in favour of keeping taxes low?

I would not support cutting services to the residents, we pay the cities' bills; I support cutting wasteful expenditures and trimming departments of city hall that are unnecessary expenditure. In this way taxes are kept lower!

- If you were elected, what services would you like to see added? What services would you like to see reduced or eliminated?

Services to add; are free personal uses of recreational centres for Port Coquitlam residents, similar to the free personal usage of the public library. Free use of the recreational facilities is not adding cost to operations as it is offset by the private groups that pay for the majority of usage time. I do not like to see any loss of services; there is no need to cut services!
